E Calculations

There are four basic processes. Notice how they are said when we are **working out** [trying to **calculate**] the answer.

+ = **addition**	e.g. 6 + 4 = 10 (six **plus**/**and** four **equals**/**is** ten)
– = **subtraction**	e.g. 6 – 4 = 2 (six **minus** four is two)
x = **multiplication**	e.g. 6 x 4 = 24 (six **multiplied by** / **times** four is twenty-four)
÷ = **division**	e.g. 8 ÷ 2 = 4 (eight **divided by** two is four)

Some people are not very good at **adding up** numbers [putting numbers together to reach a total], and often **get stuck** [have a problem] if they have to work out something quite difficult. The easiest way is to use a **calculator** [a small electronic machine for working out numbers].
